Nichols Hydroseeding  
**Re: TO-029**

This Letter certifies that our grass seed supplied to Nichols Hydroseeding for the above referenced project meets or exceeds the following quality standards and associated requirements.

**Seed Mix-**

<b>Percent</b>	<b>Variety</b>
<b>30</b>	<b>*Panther GLS Low Grow Perennial Ryegrass</b>
<b>30</b>	<b>Chewings Red Fescue</b>
<b>20</b>	<b>Creeping Red Fescue</b>
<b>20</b>	<b>Hard Fescue</b>

\*Note to the engineer: this mix is a 70/30 blend, but substituted for varieties that are formulated for Puget Sound region. Creeping and Chewings Fescue are cultivated and harvested in the Willamette Valley, and adapted to the Puget Sound climate. Hard Fescue will exhibit drought tolerance for the 60 dry period in typical summers. All turf varieties submitted in this blend will be grown and harvested in Oregon, and are 2012 crop.

\*Barclay's Perennial Ryegrass is no longer produced.

No Noxious Weeds Present

We further certify that this seed will meet all requirements for the Federal Seed Act (7 U.S. C. 1551-1610) and complies with federal and state standards for purity, germination, and weed content. If you have any questions or concerns please contact me.

Sincerely,

A handwritten signature in blue ink that reads "Pete Sarrensen". The signature is fluid and cursive, with a long horizontal flourish extending to the right.
