HydroStraw, LLC certifies that HydroStraw® BFM contains the following properties and characteristics

DESCRIPTION-

HydroStraw® Bonded Fiber Matrix is designed to be more cost effective than blankets and cost less to apply per acre than conventional BFM mulches on difficult sites, slopes and adverse soil conditions where extra erosion prevention is needed.

The product includes long natural fibers for maximum matrix entanglement for improved performance.

The combination of fiber entanglement in conjunction with our cross linked high-strength polymer binders produce great erosion prevention and vegetation establishment.

HydroStraw® Bonded Fiber Matrix in field tests has shown that the annually renewable heat and mechanically treated straw fibers in this product improves seeds germination and vegetation establishment. Research has shown that vegetation is many times better than temporary mulches in erosion prevention. Thereby the ultimate goal is creating an environment for rapid vegetation establishment with seed friendly straw fibers.

HydroStraw® Bonded Fiber Matrix consists of annually renewable heat and mechanically treated straw fibers, environmentally safe, fibers that are biodegradable and a non-toxic green colorant to aid in application.

Field tests have shown HydroStraw® mulch protects soil and enhances seed germination and vegetation establishment as the fibers bio-degrades. (V.E.M. Vegetation Establishment Mulch)

Physical Characteristics		
Toxicity	Non-Toxic	
Applied Color	Green	
Sufrace Tension	Material will evenly disperse and suspend when agitated in water	
Absorbancy	When sprayed uniformly at the recommended rate, the mulch fibers form an absorbent mulch cover which will allow percolation of water and increased water infiltration to the underlying soil matrix	
Solubility	Mulch Fibers are non water soluble	
PH	06.8 +/- 0.5	
Average Fiber Length	1/2" +/- 1/4"	

Packaging and Shipping Data		
Bag Size	11.5" x 17" x 25"	
Bag Weight	50 lbs Compressed Bales	
Pallet	40 bags (52W x 45D x 96H)	
Full Truck	22 Pallets, 880 Bales	
Packaging	Moisture resistant packaging	

Composition	
Heat & Mechanically Treated Straw Fibers™ (HMT™)	67.0% +/- 1.0%
Cellulose Paper Mulch	2.5% +/- 1.0%
Natural Fibers for Matrix Entanglement	10% +/- 1.0%
Proprietary Tackifiers	10% +/- 1.0%
Moisture Content	10.5% +/- 1.5%

Mixture F	Rates	
Hos	e Work	60 lbs per 100 gallons
Tow	er Work	75 lbs per 100 gallons

WARRANTY

HydroStraw, LLC warrants that its products are free from defects and will perform as stated in this literature. If our product does not meet product specifications, notice of failure must be received within 15 days of failure. HydroStraw, LLC will not warrant that the product will perform under unlimited circumstances that are caused by soil conditions, installation, and/ or weather variables.

Slope Gradient/Condition	lb/acre
≤ 3:1	3,000 lbs/ac
≤ 2:1	3,500 lbs/ac
≤ 1:1	4,500 lbs/ac
Soil Moisture Retention	2,000 - 3,500 lbs/ac
