

2012

JB Signature OREGON GROWN Dense Shade Mix
(SPECIFICATIONS)

Dense Shade Blend

34.85% Cardinal Creeping Red Fescue
39.23% Compass Chewings Fescue
9.92% JB 2000 Perennial Ryegrass
9.84% Pizzaz Perennial Ryegrass
4.91% Chariot Hard Fescue

JB Signature's main attributes are as follows:

- Winter hardy
- Good green color
- Fine blade, dense turf
- Better adaptation for dense shade areas
- Disease resistant
- Most shade tolerance

JB Signature SEED is a blend of 80% Fine Fescues and 20 % Perennial Ryegrasses which are specifically recommended for this area. They have been proven to outperform other grasses in the cool, damp Pacific Northwest climate. All seed has been grown in Oregon. This seed is grown in the rich dark soil of Oregon's Willamette Valley.

These specifications are subject to change.
